RESUME

MADDY SAINI

ABOUT ME

I'm Maddy Saini, a 14-year-old student and AI explorer from Sonipat, Haryana. I experiment with tools like Higgsfield, mainly exploring generative AI and creative visuals. I'm also interested in the developer side of AI and am learning coding and software development. Outside tech, I enjoy drawing, am learning piano and guitar, and love listening to music.

I'm currently studying in Class 9 at Holy Faith School. I completed a program with Alchmy EdTech that largely covered concepts I had already explored. independently. My hands-on work includes writing efficient, precise prompts to guide AI toward the results I envision too.

PROJECTS

Idea Validator
An AI-assisted tool for evaluating startup ideas and identifying what needs testing.

Agent for 3ds Max
Developing an AI agent to handle practical 3D tasks directly inside the viewport.

Secret Ideas
Exploring new concepts and experiments behind the scenes.

SKILLSET

Generative AI — 90%

Building Websites / AI Tools — 60%

Communication — 70%

BEYOND THIS
